I bring over 17 years of experience in software automation and manual testing to the table. Throughout my professional journey spanning the United Kingdom and Austria, I've honed my technical acumen in an array of tools including Selenium WebDriver, C#, QTP, VB Scripting, VBA, and SQL.

One of my key strengths lies in my leadership abilities, which are underpinned by effective communication skills. This enables me to seamlessly navigate diverse team environments and project demands. My familiarity with Project Execution methodologies such as Agile and Scrum further amplifies my adaptability, ensuring successful outcomes across varied project structures.

I have a proven track record in developing and implementing comprehensive test strategies, conducting meticulous Use case Analysis, and crafting detailed plans, schedules, scenarios, and reports. My analytical prowess and adept problem-solving capabilities allow me to innovate and deliver time-efficient solutions that meet and exceed expectations.

My extensive background spans automation testing, web testing, regression testing, system testing, black box testing, integration testing, and user acceptance testing.

Additionally, my B1 German certification from ÖIF reflects my commitment to continuous learning.

WORK EXPERIENCE

International
Atomic Energy
Agency

Jul 2012 - Present
VIENNA

SENIOR TEST ENGINEER

- Collaborated with stakeholders to understand project requirements, defining test objectives, and creating a test plan outlining testing approach, scope, resources, and schedule.
- Created test documentation, including test plans, test cases, test scripts, and test reports, to ensure traceability and facilitate knowledge sharing within the team.
- Documented any defects found during testing, including clear steps to reproduce, and tracking them to resolution by working closely with developers and other team members.
- Adaptable to changing project requirements, timelines, and priorities, and efficiently managing multiple tasks and priorities simultaneously.
- Leveraged Selenium WebDriver and C# for robust test automation.

BUPA, UK

Nov 2007 - Jul 2012
MANCHESTER and
MUMBAI

AUTOMATION TEST LEAD

- Spearheaded client relationship management as the designated single point of contact for BUPA, overseeing all UAT automation activities.
- Coordinated seamlessly with offshore automation teams to ensure efficient regression automation processes.
- Implemented automation of Regression Test Scripts utilizing QTP, optimizing testing procedures.
- Took charge of developing and maintaining QTP Scripts, actively participating in review meetings to ensure quality and effectiveness.
- Leveraged agile methodology to develop automation scripts across various scrums, fostering adaptability and efficiency in project execution.

DATAMATICS
LIMITED

Oct 2006 - Nov
2007
MUMBAI

TEST ENGINEER

- Spearheaded the development and maintenance of automated QTP scripts, enhancing testing efficiency.
- Actively participated in review meetings, contributing to continuous improvement processes.
- Resolved complex environmental issues, providing reliable support for the test team.
- Streamlined QA processes by automating test scripts with Quick Test Professional (QTP).
- Crafted comprehensive test cases and matrices, ensuring thorough coverage of application functionality.
